All flag dimensions stated are nominal and joint widths are accounted for in any patio plan dimensions. Overall area coverage figures also include a nominal 10mm joint width. Depending on patterns and layouts joint widths may need to vary slightly to continue pattern lines through the patio. Brett Landscaping cannot be held responsible for any excess or shortfall of units resulting from these statistics.

All block statistics per sq.m. could potentially be rounded up to the nearest whole unit. When multiplied over a large area to get an overall volume it can result in a small excess being incurred. Generally for CBP quantities an extra of approx. 10% is suggested to account for natural wastage and cutting. Brett Landscaping cannot be held responsible for any excess or shortfall of units resulting from these statistics.
